The population is distributed as follows:—

City municipalities, 1,570,000; Towns (over 5,000 population), 186,358; Rural (including all other) municipalities, 1,806,419.

BIRTHS

The number of living births registered was 62,234, being again a numerical decrease, on this occasion of 1,412. This, however, is less than 45% of the numerical decrease of a year ago, and it is hoped that the smaller decrease indicates a turn to an upward trend.

The rate per 1,000 of population was 17.5, which again constitutes the lowest rate since 1875. In all probability, however, it is a low record in the history of registration in the Province, for, it is a recognized fact that, registration in the early years was notoriously bad.

There were 31,850 boys, or 51.2% of the total number; and 30,384 girls, or 48.8% which represents 104.8 male to 100 female births.

In the case of illegitimate births 75.5% of the mothers were under 25 years and of the total 2,500 such births, 1,272 or 50.9% were boys and 1,228 or 49.1% girls.

MULTIPLE BIRTHS

There were 682 cases of twin births. Of these 696 were males and 668 females.

There were 6 cases of triplets, 6 boys and 12 girls.

1 case quintuplets—5 girls.

Table 15 will give a detailed explanation of the multiple births.

QUINTUPLETS

The most famous case of multiple birth in the written history of the world took place in the Township of East Ferris, in the District of Nipissing, about 212 miles north of the City of Toronto. Here, on May 28th, 1934, were born five female children to one Oliva Dionne, a farmer, age 30, and his wife Elzire Legros, age 25. This couple were already the parents of five children. The total weight of the children was 13 pounds, 6 ounces.

These children were later named Annette, Cecile, Yvonne, Emelie and Marie.

The mother was attended by Dr. Allan Roy Dafoe, a physician residing at Callander, about two miles distant. When he arrived at the home at 4.00 a.m. one of the children had already been born.

The home was typical of that part of the Province, a frame building heated with wood stoves, and furnished as might be expected, not at all luxuriantly, and it is a tribute to the general practitioner that in such circumstances, assisted by two women only, without any provision for such a contingency, these children were all born alive and are living at this date.

It is stated that in about 500 years some 30 cases of quintuplet births have taken place, none of which lived beyond an hour.

These children have been taken into the paternal care of this Government which has spared no effort to make it possible for them to survive and Dr. Dafoe states that there is no reason why they should not reach maturity.

DIVORCES

There were 365 Decrees of Absolute Divorce granted by the Courts of Ontario in 1934. This was an increase of 57 over the preceding year.

The reason for the small number granted in 1931 is that the Divorce laws became effective for the first time in the Province, and as six months must

elapse between the decrees nisi and absolute, all decrees nisi granted after July 1st, would not be effective until after January 1st of the following year.

The following Table shows the Decrees Absolute granted by the Provincial Courts since the institution of the law:

Of these divorces 105 were granted to men and 260 to women.

There was a numerical decrease of 182 deaths and a decrease of 0.1 in the rate. This is the lowest death rate since 1879 when the death rate was 9.6, but again we may reasonably assume that there was carelessness in respect to registration, if not as great as in the case of births, sufficiently great, nevertheless, to say that 9.9 is an all-time low record. It is exceeded as a low rate only in New Zealand (7.3), Australia (8.8), the Netherlands (9.0) and South Africa (8.6).

In regard to the above causes it may be noted that the total for 1934 is 25,590 and accounts for 73.9% of all deaths.

Organic Heart maintains its upward direction. Tuberculosis again reflects the result of public health education by its new low rate of 37.5. Diseases of the arteries shows the highest rate it has ever reached.
